

## EUGEN ȘERBAN

1932–2001

On the 25th of September 2001 the Speleological Institute “Emil Racovitza” lost one of its most distinguished researchers, Eugen Șerban. He died of leukemia, only 7 days after reaching the age of 68.

Eugen Șerban was born in Bucharest the 13th of September 1932. His father, Nicolae Șerban, was a clerk at the National Bank and his mother, Aurelia Șerban, was a housewife. Eugene had a younger brother, Nicolae who became a marine officer.

Between 1943 and 1952, Eugen Șerban studied at the “Cantemir Vodă” National College, distinguishing himself as a very good pupil, especially gifted for drawing and painting. From 1952 to 1955, he attended the courses of the Faculty of Biology at the University of Bucharest. From his first year of faculty, he was guided by Professor Radu Codreanu (member of the Romanian Academy) toward the domain of the zoology of the invertebrates and from his second year of faculty he became a member of the students’ debating society for the study of hydrobiology, led by Professor Traian Orghidan.

After finishing his studies, in the autumn of 1955, Eugen Șerban was appointed main preparator in the Faculty of Biology at the Zoological Station in Sinaia where he studied the Simuliidae, describing some new species.

In 1958, he moved to the Centre for Biological Researches of the Romanian Academy, at the Phreatobiology Laboratory led by Professor Constantin Motaş (member of the Romanian Academy).

In 1961 he joined in the Speleological Institute "Emil Racovitza", then, also, under the guidance of Professor Constantin Motaş.

As part of his activity at the Speleological Institute, Eugen Şerban explored a great number of caves, especially from the upper basin of the Cerna Valley, but his main preoccupation was the study of the subterranean aquatic crustaceans. His first aim was the Microparasellidae, describing three new species belonging to the genus *Microcharon*: *M.motasii*, *M.orghidanii*, *M.oltenicus*. Then, he studied the subterranean Amphipoda, respectively the genera *Bogidiella* and *Niphargus*.

Beginning with 1965, Eugen Şerban dedicated himself to the study of the Bathynellacea. In 1970, he defended his Ph.D. thesis, entitled "*Bathynella* (Podophallocarida, Bathynellacea)" before a commission composed of O. Boldor, deputy dean of the Faculty of Biology (president), Prof. Margareta Dumitrescu (supervisor), Prof. C.Motaş, Prof. R. Codreanu, Prof. Tr. Orghidan.

Eugen Şerban published numerous papers and described a great number of new taxa among the Bathynellacea, alone or in collaboration with: D. Dancau, N. Coineau, Cl. Delamare-Deboutville, J. Comas i Navarro, P. Leclerc, A. I. Camacho, N. Guil.

Starting with his Ph.D. thesis, Eugen Şerban argued that the Bathynellacea did not belong to the superorder Syncarida but represented an ensemble of the same level which he named Podophallocarida. In the conception of Eugen Şerban, the order Bathynellacea, respectively the superorder Podophallocarida, represents an archaic group characterized by primitive features (8 free pereionites, the presence of the furca on the telson, the constitution of the pereopods) and some original features (absence of the petasma, transformation of the VIII male pereopode into a penis). The conception of Eugen Şerban is at present even more noteworthy considering that in recent phylogenetic reconstitutions the group Syncarida (which would include Palaeocaridacea, Anaspidacea and Bathynellacea) is no longer regarded as a monophyletic group, each of the three groups representing independent phyletic lineages.

Eugen Şerban was married to Mihaela Şerban, a distinguished biologist who worked at "Apimondia", guiding the publications of this association. Mihaela Şerban, born Derlogea, descended from a family of biologists: her father, Horia Derlogea was a University Professor at the Veterinary Faculty, while her mother, Veturia Derlogea, was one of the first Romanian geneticists. Eugen and Mihaela Şerban had two children: Vlad Şerban (a hydrologist engineer) and Leonica Şerban (a biochemical researcher).

By a significant coincidence, Mihaela Şerban died in a sanatorium the same day, only a few hours before the death of Eugen Şerban.

The colleagues from the “Emile Racovitza” Institute of Speleology lost by Eugen Șerban’s disappearance, a very good friend.

One of us (A. G.) lost a generous colleague, always ready to share his vast knowledge in many domains such as biology, painting and music: in many ways, we saw in him a master and a friend.

IONEL TABACARU  
ANDREI GIURGINCA

#### LIST OF EUGEN ȘERBAN’S SCIENTIFIC WORKS

1958. *Contribution à l'étude des Simuliidae de la République Populaire Roumaine. I. Eusimulium codreanuï nov. sp.* Arch. Inst. Pasteur Algérie. T. XXXVI, no. 2, p. 184–191.
1960. *Contribuții la studiul Simuliidelor din Republica Populară Română. II. Simulium voilenis nov. sp.* Com. Acad. R.P.R., T. X, nr. 2, p. 125–134.
1960. *Contribution à l'étude des Simulies de la République Populaire Roumaine. II. Simulium voilenis n. sp.* Rev. Biol. T. V, nos. 1–2, p. 145–153.
1961. *New and little known species of black-flies of the group Eusimulium aureum Fries (Diptera, Simuliidae) from Romania.* (in Russian, summary in English). Rev. Ent. U.R.S.S. T. XL, no. 3, p. 677–685.
1961. *Cercetări freatobiologice: Valea Motrului (Notă preliminară).* Stud. Cerc. Biol. Ser. Biol. Anim. T. XIII, no. 2, p. 227–236 (in collab. with C. Motaș).
1963. *Sur une nouvelle Parabathynella de Roumanie, Parabathynella motasi nov.sp.* Crustaceana. T. V, no. 4, p. 241–250 (in collab with D. Dancău).
1964. *Nouvelles données sur les Microparasellides (Isopodes) de Roumanie: Microcharon motasi nov. sp., Microcharon orghidani nov. sp. et Microcharon oltenicus.* Vie et Milieu. T. XV, no. 2, p. 341–364.
1964. *Cercetări speologice în bazinul Cernei. Nota I.* Lucr. Inst. Speol. “E. Racoviță” T. III, p. 131–199 (in collab. with Șt. Avram and D. Dancău).
1965. *La présence de Bogidiella albertimagni Hertzog 1933 en Roumanie et quelques remarques sur les espèces européennes du genre.* Int. Jour. Speleol. T. I, no. 3, p. 339–348 (in collab with D. Dancău).
1965. *Recherches phréatobiologiques. II. La capture des Niphargus adultes par le procédé des sondages Karaman-Chappuis. Les crues et la biocénose de la nappe phréatique.* Int. Jour. Speleol. T.I. no. 3, p. 321–332 (en collab. avec C. Motaș).
1965. *Concerning the presence of Bathynella natans stammeri Jakobi (Crustacea, Syncarida) in England and Romania.* Ann. Mag. Nat. Hist., VIII, p. 513–522 (in collab. with T. Gledhill).
1966. *Contribution à l'étude de Bathynella d'Europe; Bathynella natans Vejdovsky un dilemme à résoudre.* Inter. Jour. Speleol., II, p. 115–132.
1966. *Nouvelles contributions à l'étude de Bathynella (Bathynella) natans Vejd. et Bathynella (Antrobathynella) stammeri Jakobi.* Inter. Jour. Speleol., II, p. 208–221.
1966. *Cercetări speologice în bazinul Cernei. Nota II.* Lucr. Inst. Speol. “E. Racoviță”. T. V, p. 11–19 (in collab. with Șt. Avram and D. Dancău).
1968. *Cercetări speologice în bazinul Cernei. Nota III.* Lucr. Inst. Speol. “E. Racoviță”. T. VII, p. 45–54 (in collab. with D. Dancău, D. Danielopol and I. Juvara).

1970. *A propos du genre Bathynella* Vejdovsky (Crustacea, Syncarida). Livre du Centenaire Emil G. Racovitza, Ed. Academiei, Bucarest, p. 265–273.
1971. *Les Gallobathynellinae, nouvelle sous-famille de Bathynellacea* (Crustacea, Malacostraca). C. R. Acad. Sci. T. 272, p. 2907–2909 (in collab. with N. Coineau and Cl. Delamare-Deboutteville).
1971. *Quatre nouvelles Bathynella* (Crustacea, Syncarida) de Roumanie; de nouveau sur le "Dilemme Bathynella Vejd." Inter. Jour. Speleol., III, 3 + 4, p. 225–240.
1972. *Recherches sur les crustacés souterrains et mésopsammiques. Les Bathynellacés (Malacostraca) des régions méridionales de l'Europe Occidentale. La sous-famille de Gallobathynellinae.* Mém. Mus. Sci. Nat., Paris, LXXV, p. 1–107 (in collab. with N. Coineau and Cl. Delamar-Deboutteville).
1972. *Bathynella* (Podophallocarida, Bathynellacea). Trav. Inst. Spéol. "E. Racovitza", T.XI, p.11–224.
1973. *Sur les Bathynellidae* (Podophallocarida, Bathynellacea) de l'Italie: *Bathynella ruffoi* nov. sp. et *Bathynella lombardica* nov. sp. Mem. Muz. Civ. St. Nat. Verona, XX, p. 17–37.
1973. *Sur le processus de la pléonisation du péréion dans l'ordre des Bathynellacea* (Crustacea, Malacostraca, Podophallocarida). Bijdragen tot de Dierkunde, 43, 2, p. 173–201.
1973. *Sur le Bathynellidae* (Podophallocarida, Bathynellacea) de l'Italie: 2. *Sardebathynella cottarelli* n. g., n. sp. Fragm. Ent., IX, 2, p. 81–107.
1973. *Sur les problèmes de la taxonomie des Bathynellidae* (Podophallocarida, Bathynellacea). Livre du cinquantenaire de l'Institut de Spéologie "Emil Racovitza", Ed. Academiei, Bucarest, p. 199–217.
1973. *A propos du genre Austrobathynella* (Bathynellacea, Malacostraca). Livre du cinquantenaire de l'Institut de Spéologie "E. Racovitza", Ed. Academiei, Bucarest, p. 175–198 (in collab. with Cl. Delamare-Deboutteville).
1973. *Le genre Acanthobathynella* Coineau (Podophallocarida, Bathynellacea) et la sous-famille des *Acanthobathynellinae* nov. Ann. Spéol. T. XXVIII, no. 3, p. 503–516 (in collab. with N. Coineau).
1974. *Contributions à l'étude de Bathynella chappuisi* Delachaux (Bathynellacea, Bathynellidae). Ann. Spéol. XXIX, 1, p. 77–95 (in collab. with Cl. Delamare-Deboutteville).
1974. *Sur les péréiopodes VIII mâles de Cteniobathynella leleupi* (Delamare et Chappuis) (Parabathynellidae, Bathynellacea). Ann. Spéol., 29, 3, p. 373–379 (in collab. with Cl. Delamare-Deboutteville).
1974. *Sur les péréiopodes VIII mâle de Habrobathynella milloti* (Delamare et Paulian) (Parabathynellidae, Bathynellacea). Ann. Spéol., 29, 3, p. 373–379 (in collab. with Cl. Delamare-Deboutteville).
1975. *Sur les Bathynella de Roumanie: B. (B.) boteai* Serban, *B. (B.) vaducrisensis* n.sp., *B. (B.) plesai* Serban et *B. (B.) motrensis* (Bathynellacea, Bathynellidae). Première partie. Inter. Jour. Speleol., VII (1975), p. 357–398.
1975. *Haplophallonella heterodonta* n.g. n.sp., *Parabathynellidé* (Podophallocarida, Bathynellacea) d'Afrique (Côte d'Ivoire). Trav. Inst. Spéol. "E. Racovitza", t. XIV, p.51–70 (in collab. with N. Coineau).
1975. *Sur les Bathynellidae* (Podophallocarida, Bathynellacea) d'Afrique du Sud. Les genres *Transvaalithynella* nov. et *Transkeithynella* nov. Ann. Spéol., XXX, 1, p. 137–165 (in collab. with N. Coineau).
1975. *Découverte de la famille des Parabathynellidae* (Bathynellacea) en Amérique du Nord: *Texanobathynella bowmani* n.g.n.sp. C. R. Acad. Sc. Paris, T. 280, sér. D, p. 2223–2226 (in collab. with Cl. Delamare-Deboutteville and N. Coineau).
1976. *Sur les Bathynella de Roumanie: B. (B.) boteai* Serban, *B. (B.) vaducrisensis* n.sp., *B. (B.) plesai* Serban et *B. (B.) motrensis* (Bathynellacea, Bathynellidae). Deuxième partie. Inter. Jour. Speleol., VIII (1976), p. 269–283.

1977. *Sur les péréiopodes VIII mâles de Iberobathynella cf. fagei de Majorque (Bathynellacea, Parabathynellidae)*. Crustaceana, XXXIII, 1, p. 1–16.
1977. *Sur les Bathynellidae (Podophallocarida, Bathynellacea) de l'Italie: Meridiobathynella cf. rouchi Serban, Coineau et Delamare*. Trav. Inst. Spéol. "E. Racovitza", T. XVI, p. 17–36.
1978. *Sur les Parabathynellidae (Podophallocarida, Bathynellacea) d'Afrique du Sud, Ctenophaillonella mutumviensis n. g., n. sp.* Bull. Mus. natn. Hist. nat., Paris, T. 351, no. 510, p. 71–89.
1978. *Contribution à la connaissance du genre Iberobathynella Schminke: I. asturiensis n. sp. et I. espaniensis n. sp., nouvelles espèces d'Espagne (Bathynellacea, Parabathynellidae)*. Trav. Inst. Spéol. "E. Racovitza", T. XVII, p. 13–39 (in collab with J. Comas i Navarro).
1979. *Odontobathynella amazonica n. g., n. sp. Leptobathynellide nouveau du Brésil (Malacostraca, Bathynellacea)*. Bull. Soc. Sci. nat. Tunisie, T. 14, p. 5–20.
1980. *La mandibule et l'individualisation des ensembles évolutifs majeurs dans l'ordre des Bathynellacea (Malacostraca, Podophallocarida)*. Bijdragen tot de Dierkunde, 50, 1, p. 155–189.
1982. *Lamtbathynella pentodonta n. g., n. sp., Leptobathynellidé nouveau d'Afrique (Côte d'Ivoire) (Malacostraca, Bathynellacea)*. Int. J. Speleol., XII, p. 63–74 (in collab with N. Coineau).
1984. *Cinq taxa nouveaux de Bathynellidés de France (Bathynellacea, Podophallocarida, Malacostraca)*. Trav. Inst. Spéol. "E. Racovitza", T. XXIII, p. 7–18 (in collab with P. Leclerc).
1985. *L'inclinaison inverse de la longueur mandibulaire dans le cadre du céphalon et les griffes masticatrices dans le sous-ordre de Parabathynellidea (Malacostraca, Podophallocarida, Bathynellacea)*. Trav. Inst. Spéol. "E. Racovitza", T. XXIV, p. 17–45.
1985. *Le développement post-embryonnaire chez Gallobathynella coiffaiti (Delamare) (Gallobathynellinae, Bathynellidae, Bathynellacea)*. Trav. Inst. Spéol. "E. Racovitza", T. XXIV, p. 47–61.
1986. *Données concernant la capsule du tronçon naupliar des Bathynellacea (Malacostraca, Podophallocarida)*. Trav. Inst. Spéol. "E. Racovitza", T. XXV, p. 3–15.
1988. *A propos de la diversification du céphalon dans l'ordre des Bathynellacea (Malacostraca, Podophallocarida). 1. Le tronçon naupliar*. Trav. Inst. Spéol. "E. Racovitza", T. XXVII, p. 29–49.
1989. *Taxa nouveaux des Bathynellidés d'Europe (Bathynellacea, Podophallocarida, Malacostraca)*. Trav. Inst. Spéol. "E. Racovitza", T. XXVIII, p. 3–17.
1989. *Le système des Gallobathynellinés et sur certains rapports entre le péréiopodes 8 des Bathynellidés (Bathynellacea, Podophallocarida, Malacostraca)*. Misc. speol. Rom., 1, p. 121–168.
1990. *Données concernant le développement post-embryonnaire dans la famille des Parabathynellidae Noodt (Bathynellacea, Podophallocarida, Malacostraca)*. Trav. Inst. Spéol. "E. Racovitza", T. XXIX, p. 3–24 (in collab with N. Coineau).
1992. *Delamareibathynella debouttevillei Serban et Delamareibathynella motasi n. sp., Gallobathynellinés de France. La tribu des Sardobathynellini nov. (Malacostraca, Bathynellacea, Bathynellidae)*. Trav. Inst. Spéol. "E. Racovitza", T. XXXI, p. 21–45.
1993. *Tianschanobathynella jankowskajae n. g., n. sp. et Tianschanobathynella paraissykkulensis n. sp. (Bathynellidae, Bathynellacea, Podophallocarida)*. Trav. Inst. Spéol. "E. Racovitza", T. XXXII, p. 19–41.
1994. *Issykkulibathynella n. g. et son espèce type I. tianschanica (Jankowskaja) (Parabathynellidae, Bathynellacea, Podophallocarida)*. Trav. Inst. Spéol. "E. Racovitza", T. XXXIII, p. 31–48.
1994. *Racovitzaibathynella emilei n. g., n. sp. et Racovitzaibathynella transvaalensis n. sp., Parabathynellidae d'Afrique du Sud (Bathynellacea, Podophallocarida)*. Trav. Inst. Spéol. "E. Racovitza", T. XXXIII, p. 11–30 (in collab with N. Coineau).
1995. *Tribu des Iberobathynellini nov., diagnoses des taxa nouveaux (Parabathynellidae, Bathynellacea, Podophallocarida)*. Trav. Inst. Spéol. "E. Racovitza", T. XXXIV, p. 15–77 (in collab with A. I. Camacho).

1997. *Uenobathynella* n. g., *Parauenobathynella* n. g., *Morimotobathynella* n. g., *Nihoobathynella* n. g. et *Paradoxibathynella* n. g., Bathynellinae du Japon (Bathynellidae, Bathynellacea, Podophallocarida). Trav. Inst. Spéol. "E. Racovitza", T. XXXVI, p. 3–63.
2000. Phylogenetical review and biogeographic remarks on the interstitial and subterranean freshwater iberobathynells (Crustacea, Syncarida, Parabathynellidae). Jour. Of Nat. Hist., 34, p. 563–585 (in collab with A. I. Camacho and N. Guil).
